Property of Continental Office™

OVERVIEW

An anchoring building of the newly constructed University Square, this breathtaking space is both a proud pillar of modern design and an exciting, welcoming space at The Ohio State University. Working with The Columbus Architectural Studio, we meticulously designed spaces that inspire. Spanning multiple floors, University Square North features flexible, open spaces that accommodate agile utility with furniture, flooring, and prefabricated interior construction. Open cafeteria spaces, modern workstations, and multiple collaborative areas come together to complete a recent project as The Preferred Furniture Sponsor of The Ohio State University.

Preferred Furniture Sponsor of The Ohio State University®

DESIGN

Entering into the building, bright whites and a light palette create a modern design serving a multitude of areas and uses for the university.

INTEGRATED DIRTT TECHNOLOGY

DIRTT's Interior Construction capabilities empowered the university to create new kinds of flexible, adaptable spaces, all in a fraction of the time compared to traditional construction.

HERMAN MILLER FURNITURE

A flexible, creative, iconic space such as this needs furniture that's all the same and more. Throughout this space, Herman Miller furniture was utilized for its inimitable design and powerful, durable function.

ELEGANT SEATING SOLUTIONS

From informal lounge to café, conference spaces, workstations and more, University Square North features a wide variety of seating with a cohesive blend of style and function.

WALLS THAT OPEN

DIRTT's impressive flexibility allowed the university to create spaces with limitless possibility. With writeable walls that can easily collapse, the space can be as segmented or as open as the moment requires, all without sacrificing design!

FLOORS THAT SPEAK

Our flooring team worked hard with designers to craft a custom solution that brought the space to life, from top to bottom. Brand-colored carpeting, beautiful concrete finishes, and more were chosen both for design and durability when creating this crown jewel of a space.
